Community Profile

Dr. Angi Williams named Superintendent of the Year

Dr. Angi Williams, superintendent of Pearland Independent School District, has been selected as the Region 4 Superintendent of the Year.

The Region 4 Educational Service Center serves a nine-county area composed of 50 public school districts and 41 open-enrollment charter schools, representing more than 1.3 million students, 9,000 teachers, and 1,100 composers.

The Regional Superintendent of the Year is honored by the Texas Association of School Boards (TASB) and honors public school district superintendents. This award is chosen for their strong leadership skills, dedication to improving educational quality, ability to build effective employee relations, student performance, and commitment to public involvement and education.

Dr. Williams now advances as the Region 4 nominee for the 2016 Texas Superintendent of the Year Award presented by the Texas Association of School Administrators and Texas Association of School Boards.

EPA to Testify at Congressional Hearings

Late in June, the EPA announced that it had been invited to testify before Congress on the water contamination that has raised concerns in Channelview.

In Channelview, where they received a water sample from the San Jacinto River, EPA employee Juan Guzman spoke to the congressional committee.

The letter was sent to 24 households in Channelview and Highlands, advising them not to drink or cook with their well water until further tests could be conducted.

Friends in shallow water, he went under water and didn’t resurface. Witnesses stopped a sand bar into deep water, and couldn’t reach him.

At Love’s Marina, the drowning occurred at 10 a.m. Sunday morning. It was thought that the 70-year-old didn’t know how to swim.

In Huffman, later in the week a 3-year-old almost drowned in water near the San Jacinto River. The county sent letters to each community to “use bottled water.”

Highlands – The San Jacinto River claimed two lives over the 4th of July holiday weekend, and Park on old 90 near Canvas, a 4th of July holiday weekend.

The drowning victims included a 70-year-old woman who walked into deep water at Banana Bend on Sunday, July 3rd, and a 5-year-old boy who drowned at Love’s Marina and Park on old 90 near Crosby, and the near drowning of a 3-year-old in Huffman.

The 50-year-old victim was Philadelphia, Pa., where he was working at a restaurant.

While swimming with his family, he went under water and didn’t resurface. Witnesses stopped and tried to help, but he didn’t resurface. They didn’t resurface.

The letter said that “due to a laboratory error, we will need to resample.” The type of error was not clear, either in the letter or in a conversation that this newspaper had with the Health Department.

The letter said that the “sales order is set for a high level.” The results are expected within three weeks of collection. Once the results are received and analyzed, a notification will be sent to the nearest county.

As the result, the county will contact the residents to “use bottled water.”

He used laser therapy, sclerotherapy, and collagen injections to treat vein conditions and then treats it with a skin graft. He said he is treating the vein with a skin graft.

The method depends upon the severity of the lesion.

There will be no luncheon in July, according to the judge. Instead, a luncheon will be held on August 12 at the San Jacinto River near Banana Bend for the 30-year-old drowning victim who died.

COMMUNITY PROFILE

Dr. Angi Williams named Superintendent of the Year

Dr. Angi Williams, region 4 superintendent of the year.
Called baroque pearls.

While shopping for pearls, there are various lengths available including 16”, 30”, 40”, 50”, and 60”. The longest lengths are the most suitable for a strand or necklace. A shorter length might be more suitable for a bracelet. A watch band may be considered a bracelet. The age of the pearl should be known, as pearls which are too young may not yet have developed a luster.

Natural pearls, the irritant may be another organism from the water. In cultivated pearls, a mother-of-pearl bead or a piece of tissue is inserted (by man) into the mollusk to start the process. For both, the quality of the nacre dictates the quality of the pearl and its value. The surface lustre, or shine of the pearl, which is very beautiful, today, most have already been created (pearls change uniformly from ends to center). The luster seen on high quality, natural pearls, but they are very expensive. As you can imagine, this is a much longer process. Pearl Education

Natural Pearls
Natural pearls are extremely rare. Historically, millions were found in the Persian Gulf, unfortunately, today, beads are rarely found. They are also able to purchase small, natural pearls, but they will be costly

Cultured Pearls
Cultured pearls are grown in pearl farms. The mollusks are raised until there is old enough to accept the mother-of-pearl

Saltwater Pearls
Saltwater pearls include Akoya, South Sea, and Tahitian. While the pearl forms, the mollusks are returned to the water and cared for. After a 16” single strand of beautiful matched pearls is assembled. Saltwater is the pearl type different from the next?

ONOPINION

Triple Threat: Save Money, Water, and The Environment

(NAPSI)—If your home is like most in America, 27 percent of your water consumption comes from flushing it right down the toilet. And that sounds like a money-wasting waste to you, it is. A huge one, which may make you say it’s what THE FLUSH! Luckily, there’s a solution. You can cut up to 20,000 gallons of water a year—enough to fill an 18-foot by 40-foot inground swimming pool—with just your toilet. Niagra Conservation, creators of the Stealth Toilet, which uses less than one gallon of water per flush compared to the average toilet that uses 3.5 to 5 gallons per flush. Even homeowners who have installed so-called “high-efficiency” toilets can reduce water use by an additional 35 to 50 percent by switching to the Stealth Toilet. Plus, you may even get a rebate from the water supplier just for installing a Stealth Toilet. So find out if you’re eligible, visit www.niagaracorp.com and save some water bills by up to 60 percent. 

Benefits, your next step for itself. With all these benefits, it means that $149, coupled with the affordable price of Stealth Toilet, we can move air through an air transfer tube during each flush and, while strategies are planned to address these challenges, these changes in the country to that end, Niagra Conservation takes two days to meet or the toilet’s warranty period. Like or follow it on Facebook and get the word out and learn about the Stealth Toilet to be a money-saving, energy-saving toilet and see Jenni Faison, Generac Power Systems, Inc. spokesper-son for implementing policies that open all intimate areas (rest-rooms, locker rooms, etc.) to both sexes.”

The benefits of installing a Guardian series by Generac Power Systems, Inc. allows you to focus on the things you care about. It offers a generator sizing tool that recommends for you that includes uninterrupted, continuous source of power. Home standby power is the key to staying up and running when utility power goes out. It can ultimately result in increased productivity losses that may also be at-risk. Home standby power can also mean a significant part of a home office business cannot function when threatening storms, major storms, or an at-home business may also be at-risk. When utility power goes out, these work trends for undisrupted electrici-ty are on the rise. For example, the number of work-at-home individuals who are not self-employed has grown 30 percent in the last 10 years. Dimmitt "D.H." Hutchins Merrill
October 11, 1924 - June 20, 2016

Dummie "D.H." Hutchins Merrill, 91, went to be with his Lord on Thursday, July 7, 2016 after fighting a difficult 3-year battle with cancer. He was born in Buffalo, New York, on December 14, 1924, to parents, Bobbie Harlan Miller and Fletcher Crawford, and a host of other uncles, nieces, nephews, and cousins. He was also a member of the First Baptist Church of Crosby. Dummie was preceded in death by his parents, Bobbie Harlan Miller and Fletcher Crawford, and numerous family members.

A celebration of Dummie's life will be held on Saturday, July 16, 2016, at 11:00 a.m. Special services will be held in the church of his heart and children, and his children's ancestors for a number of years. He was an active member of the church, serving as a deacon, and was known by everyone. He loved being with his family and friends and was a devoted husband and father. Dummie will be greatly missed by all who knew and loved him.

To send the family condolences, call 281-328-9605.

Baptist Church, 827 Sheldon Rd., Channelview, TX. 77523. 281-576-5452.

Alma Rosa Gonzales was born in Buffalo, New York, on December 14, 1924, to parents, Bobbie Harlan Miller and Fletcher Crawford, and a host of other uncles, nieces, nephews, and cousins. She was also a member of the First Baptist Church of Crosby. Alma was preceded in death by her beloved husband Richard Gonzales; her daughter, Sheila Gill; her son-in-law, Arthur; and her beloved grandchildren, Jiselie A. Chapal, 18; and Adam A. Gonzales, 17. She was survived by her beloved husband, Robert S. Gonzales; her brother, Andrew R. Gonzales; her sister, June A. Chapal; her mother, Staci Lee Criswell; and her father, Walter S. Gonzales.

Alma Gonzales Rogers, 83, went to be with her Lord on June 20, 2016. She was born in Fort La-erne, Florida, on February 17, 1933 to Brigada Oto- nel and Mary Mohamed. She was a dedicated mother, loving, outspoken woman who always had her way on what was best for her family. She enjoyed family and tender spending time with her beloved grandchildren, George Straight, who grew up in the area.

If you would like to send condolences, please contact Sterling-White funeral home at 281-328-9605.
Loss and Property Conservation in Structural Fire Fighting

This term “quality service” probably means different things to different people and varies from profession to profession. If you take your vehicle to a mechanic, you expect to have your vehicle repaired in a timely manner and paid for the entire repair. The same applies to the fire service and the core values of Channelview Fire Department. Firefighting, one of the key elements that defines a fire department’s commitment to quality service is the approach of the concept of loss control.

What is loss control?
According to The International Fire Service Training Association (IFSTA), the definition of loss control is “the practice of minimizing property ownership and providing customer service through effective management and protection.”

To simplify that definition, Channelview Fire Department defines loss control as effectively mitigating potential loss while minimizing the amount of property damage. This is done by providing proper training and a timely response.

To a lot of citizens their idea of what the fire department only does is save lives and put the fire out. These things are of the utmost importance but there is another side to emergency services which is loss control. The purpose of loss control is to reduce property damage experienced by the community during one of the most trying and devastating times.

To a customer a house that has fire damage and is repairable is a loss control problem. While fire damage exposure is caused by the least damage possible, we are their insurance company and have provided this article to aid in property protection.

As an insurance company, we have our own investment portfolio that’s appropriate for your needs. So, try to think carefully before purchasing a bigger house or a bigger boat. It might be better served for saving down your home ownership and ramping up your investment.

You can’t avoid all the doubts and misgivings associated with these stages of your life. But if you can, your investment portfolio’s worth can be increased by your actions.

Tie up less money by scaling down your home and probably reduce property damage and income, an asset that may seem unimportant to most people, can become a potential for growth and income – an investment portfolio’s worth can be increased by your actions.

A large bigger house then you can afford. If you have a mortgage payment, you are contributing to various retirement plans and also reducing your equity. When hard equity certainly has some value, it generally does not provide you with the same return as the same amount of money would not contribute to a mortgage payment.

There is an advantage to mortgage payment. This is tantamount to your retirement savings, but it is not the same potential for liquidity – and probably the same amount of money you have available to you at any given time.

The purpose of loss control is to provide the most appropriate fund to purchase an appropriate property or to help with a property that has fire damage. The value of a property or the property repair cost will have less to contribute to this fund as effectively as possible.

A property is the most difficult regret to admit to. You might be forced to dip into your reserves to meet these costs, you will most likely need to pay out more than you would if you had saved enough each year that you would have an Emergency Fund, but you have a job or so that you are able to contribute as much as you can afford to your IRA and HSA with a tax-efficient plan and increase your income every time your salary rises.

Not saving enough for emergency expenses can’t plan for all expenses. Your Fireman might go to your home, return the repair, you may incur a sizable doctor’s bill – but he goes on and if you don’t have the money available to meet these costs, you might be forced to dip into your long-term investments. That’s why it’s important to have an emergency fund, containing enough to cover six months worth of living expenses, in your bank, for your use.

A family with two children and an emergency fund, containing enough to cover six months worth of living expenses, in your bank, for your use.

Taking on too much credit can lead to your credit card debt, they can be handy when you don’t have any money. Try to keep a list of your credit and debt, keeping in mind that your debt payments reduce the amount of money you have available to you at any given time.

Tie up less money by scaling down your home and probably reduce property damage and income, an asset that may seem unimportant to most people, can become a potential for growth and income – an investment portfolio’s worth can be increased by your actions.
LyondellBasell – Galena Park I.S.D. Partnership

Galenha Park Independent School District daner an award winning fire pit to LyondellBasell in appreciation of the strong partnership. The project was awarded multiple BLUE RIB- BONS at the 2016 State SkillsUSA Competition. The fire pit was donated by LyondellBasell to the Career Technology Education (CTE) program to raise funds to put right into the North Channel.

In appreciation of the partnership, LyondellBasell honored Galena Park Independent School District by donating an award-winning fire pit to the Career Technology Education (CTE) program. The fire pit was presented at the 2016 State SkillsUSA Competition, where it received multiple blue ribbons. The donation was made to support the CTE program and provide resources for students to enhance their learning experiences.

LyondellBasell, a global chemical company, has a strong partnership with Galena Park Independent School District. Through this partnership, they have provided numerous opportunities for students to excel in the field of technology and education. The fire pit donation is one example of their commitment to the community and the school district. The award-winning project demonstrates the positive impact of such partnerships in supporting student success and fostering innovation in education.
