AUSTIN – The Texas Supreme Court has agreed to take another look at the definition of a “suit” in a case dealing with the clean-up of waste pits in eastern Texas. The court’s decision means that the case will be the subject of further litigation to determine whether the waste pits in eastern Texas are eligible for the “suit” definition, which is the basis of a lawsuit filed by the state against a company to force it to clean up the waste pits.

The court’s decision in the case of the Texas Supreme Court is significant because it will affect the cleanup of waste pits in eastern Texas. The court’s decision will likely have implications for other lawsuits involving waste pits in the state, and it may also have implications for other cases involving waste pits in other states.

Students receive CPR kits

Seventh grade athletes at Baytown Junior School show off the CPR kits they received from Laurie Terry (back, third from left), vice president of Houston Methodist San Jacinto Hospital, and Donna Garey (right), chief executive officer and president, as they showed them the basics of CPR. Student Terry (back, third from left), vice president of Houston Methodist San Jacinto Hospital, and Donna Garey, (left) showed Savannah, Brandon Moody, Faith Stemp, Marielle Cren and Eslinda Alba, Houston Methodist San Jacinto Hospital donated more than 300 CPR kits to Baytown Junior School students.

Motorcyclist dies in a head-on accident in Highlands

HIGHLANDS, Texas – Last Saturday night a motorcyclist died and another ended in critical condition after a head-on crash. The accident happened around 8:15 p.m. near the intersection of Barbers Hill Road and FM 2100. According to police reports, a motorcyclist traveling northbound was striking a motorcyclist driving eastbound on Barbers Hill Road after the head-on crash. One of the two motorcycles laying on the ground was taken by LifeFlight to Ben Taub.

Philip George Chiropractic students at the Goose Creek Center of Chiropractic were honored at the recent 5th annual Goose Creek Education Foundation Students Choice Awards Banquet. The event was held at the Woodforest Bank Pavilion at the North Channel Park and included music as well as entertainment by the Goose Creek Monarch High School Orchestra under the direction of Roxane Chappell, from Goose Creek Memorial, DISD.

Robert E. Lee and Sterling high schools submitted letters to the Goose Creek Education Foundation nominating teachers who had great impact on students who were selected to attend the Students Choice Awards. Each teacher received a plaque and gift card, each with a video of the letter they submitted from the Goose Creek Education Foundation. Teachers were invited to attend the Students Choice Awards. Each teacher received a plaque and gift card, each with a video of the letter they submitted from the Goose Creek Education Foundation.

DeWhurst appoints Senate Finance chair

AUSTIN — Lt. Gov. David Dewhurst on July 17 appointed five senators to serve through Aug. 31 with the powerful, state budget-writing Senate Finance Committee. The two-year state budget clock begins July 1, and Dewhurst said his decision by the appointment is a transition between sessions, an event that under his leadership would “keep the Texas miracle moving forward.”

Dewhurst, who provides oversight for the state’s 14-member, 35-questions additional members of the 34-member Senate, is being named Rick Birdseye, R-Ingleside; Richard Glenn, R-Corpus Christi; and Donny R. Gregory, R-Odessa. Those senators represent counties in central,

County (Alabama) v. Holder.

Texas added jobs in June

Texas Workforce Commission reported on July 18 announced 10,160 seasonally adjusted unemployment rate in June 5.1 percent. In June 2013, the state’s unemployment rate was 5.4 percent. The seasonally adjusted unemployment rate in June 2014 was 5.1 percent, an improvement of 0.4 percent since the same month last year.

been found in the soil. Benzene and DNAPLs have volatile organic compounds, flooding. PCBs, arsenic, volatile and then take appropriate contingency measures as needed.

Located near the San Jacinto River at Old Beaumont Highway and Gulf Pump Road, the French Limited Site was a sand quarry in the 1930s and 1940s that left a 6-acre sand pit. The location then accepted industrial waste material from 1966 until 1973 taking in an estimated 90 million gallons of chemical waste, transforming it into a lagoon. This site is within the San Jacinto River flood plain in a floodway subject to potential flooding. PCBs, arsenic, volatile organic compounds, benzene and DNAPLs have been found in the soil.

So, after taking out contaminated ground water, remaining contamination was too shallow to be cleaned up before the federal and state drinking water levels. From 1992 through 1997, the pump and treat system was implemented and operated to clean drinking water bearing zones. Since 1996, ground water monitoring has been performed to document if residual ground water contaminants can meet drinking water levels. No, it is not as safe as drinking water.

Those parties named as potentially responsible for the pollution formed the French Limited Task Group in 1998. The French Limited Task Group has investigated and implemented remedial measures in the Site but hazardous substances remain in the ground water at the Site are addressed in the new plan. The plan is waive drinking water levels in the two zones. Prevent installing wells nearby and do statutory reviews every five years. The pump and treat remedy previously used are not capable of achieving needed water safe for drinking water.

No, it is not as safe as drinking water. EPA Suit

The plan is waive drinking water levels in the two zones. Prevent installing wells nearby and do statutory reviews every five years. The pump and treat remedy previously used are not capable of achieving needed water safe for drinking water. EPA Suit

The company appealed to the Fifth Circuit Court with the argument that “suit” was ambiguous in the contract. They contended that a defense was not owed to them based on the policy as well as payment for more than $5 million in attorneys’ fees from the start of this action.

A federal district court judge granted summary judgment for the insurers, determining that the EPA CERCLA Action was not a suit triggering the duty to defend. So the company appealed to the Fifth Circuit Court with the argument that “suit” was ambiguous in the contract. They contended that a defense was not owed to them based on the policy as well as payment for more than $5 million in attorneys’ fees from the start of this action.

The EPA demanded that McManus make reimbursement, prevent further contamination, and that the company fund a Remediation Investigation/Feasibility Study. When the company persevered this to their insurers companies, insurers maintained these were not known at governmental notice. Those parties named as potentially responsible for the pollution formed the French Limited Task Group in 1998. The French Limited Task Group has investigated and implemented remedial measures in the Site but hazardous substances remain in the ground water at the Site are addressed in the new plan. The plan is waive drinking water levels in the two zones. Prevent installing wells nearby and do statutory reviews every five years. The pump and treat remedy previously used are not capable of achieving needed water safe for drinking water.

The Queen and King of Barrett Station grace Saturday’s parade down Main Street last Saturday there were three other queens for Barrett Station as well.

Yard of the Month

Congratulations to Barrett and Christie Test for Yard of the Month for July! This photo was taken Wednesday July 9th at the Test Home on East Canal in Highlands. What beautiful hard work they have put in!
Arkema, an international leader in specialty chemical and performance materials, invited six talented GPISD teachers to participate in the Arkema Science Teacher Program, held July 8th through 10th. The three-day Arkema Science Teacher Program paired these six teachers with Arkema scientists to explore a professionally-developed, grade-specific science experiment kit. Each kit contains up to eight weeks of exciting and engaging classroom instruction material. Teachers spent these days alongside Arkema scientists exploring their kits and gaining valuable insight as to how to apply the concepts of weather and environmental systems to their classroom. At the conclusion of the intense training session, the teachers had a deep understanding of their Arkema-provided science kits. Each teacher received a $500 donation to each of the three selected campuses to help enhance their science programs.

Leticia Alvarado and Nemia Carpio from Jacinto City Elementary (JCE), and Ingrid Larrazabal and Amalia Torres from Clovis Lake Elementary (CLOE) led the Monitoring data collection. These Arkema scientists and the classroom teachers work side by side to encourage students and guide them through their experiments.

Arkema Training Specialist, Nemia Carpio, Cheryl Stapp, Arkema Logistics Clerk, Karen Bernal, Milagros De Larrazabal, Amalia Torres, and Jessie Angelle.

Pictured (l/r): Kim Marak, Arkema Science Teacher Program Director, Leticia Alvarado, Thomas Hinckley, Arkema Training Specialist, Nemia Carpio, Cheryl Stapp, Arkema Logistics Clerk, Karen Bernal, Milagros De Larrazabal, Amalia Torres form Clovis Lake Elementary (CLOE), and Jessie Angelle from Woodland Acres Elementary (WAE), and Dr. Greg Shaw from East Houston Regional Medical Center. He brings a new era of pediatric care services to East Houston.

**Arkema Science Teacher Program**

- Teachers attended scientific sessions with Arkema scientists.
- Each teacher will bring the ARKEMA Science Experiment Kits to their classrooms.
- Arkema also made available for community use toxic gas monitoring equipment, which will be placed on the property line of East Houston Regional Medical Center. The equipment will be available to measure toxic air pollutants including benzene.
- Teachers will then conduct their own research and will apply the concepts of weather and environmental systems to their classroom.

Arkema also made publicly available for community research monitoring data collected at the property line of the facility. Monitoring data was collected using a fence-line air monitoring system. There are significant health threats to the surrounding communities including cancer risk for at least one million people, while also reducing the pollution of nearby communities.

**Community**

- The EPA is proposing new standards for refinery emission controls that would significantly reduce the hazards associated with the burning of volatile organic compounds (VOCs) and benzene releases from various parts of refineries including: benzene control, VOCs control, and the burning of air pollutants outside the refinery. This will reduce the health threats from the burning of volatile organic compounds, which are major contributors to the toxic air pollution in communities near refineries.
- The EPA is proposing to tighten the benzene standard, which would result in approximately a 40% reduction in benzene emissions from refineries.
- The EPA is also proposing new standards for refinery emissions from various parts of refineries including: benzene control, VOCs control, and the burning of air pollutants outside the refinery. This will reduce the health threats from the burning of volatile organic compounds, which are major contributors to the toxic air pollution in communities near refineries.

Judge Emmett also mentioned that his plan last year for a $1.2 billion bond sale to turn the Astrodome into an events center was publicly damaged and presented, and voices turned down the plan last summer. Nevertheless, his comment about the new scheme emphasized that “it’s just a silly plan.”

ED Emmett’s new scheme was $66 million. The Houston Texans and their architect, Gensler Associates.

New ambulance for Galena Park FD

The Houston Texans and the Livestock Show and Rodeo have proposed to convert the iconic “Dome” into a green area, which they say will be like Discovery Green in downtown Houston. The design was shown with renderings by the architectural firm, Gensler Associates.

Even though there is not a specific proposal as yet under consideration by Harris County, the county is not opposed to the concept of turning the Astrodome into an events center.

More information can be found on the Houston Texans website or by contacting the Astrodome Redevelopment Authority at 713-278-5700.
