JACINTO CITY RECEIVES GRANTS TOWARD NEW AMBULANCE AND POLICE BODY CAMERAS

By Alan Jamail

JACINTO CITY — Friday, July 22, 2016 at City Hall, Congressman Sheila Jackson Lee announced the first round of grants for cities and towns from the Port of Houston Authority. The $700,000 award will be used to purchase a new ambulance and police body cameras.

Jackson Lee said the Port Commission has awarded the contract to ZPMC, a China-based heavy-duty equipment manufacturer. The buildout of the equipment will be done in two phases based on market demand. The buildout of ship-to-shore cranes at the Bayport Complex is being done in three phases.

The Port Commission also entered into a contract to ZPMC, a China-based heavy-duty equipment manufacturer. The buildout of the equipment will be done in two phases based on market demand. The buildout of ship-to-shore cranes at the Bayport Complex is being done in three phases.

According to the port, ship-to-shore cranes are a vital part of its operations and are used to load and unload cargo from ships. The cranes have a large geographic area which must be covered, and are able to lift large containers.

The cranes are expected to be delivered to Wharf No. 2, are 12 stories high, and will be placed on Wharf No. 2.

San Jacinto College and the Port of Houston Authority are working together to bring new technology to the area. "It's great to see him represent San Jacinto College and the Port of Houston Authority," said Greg Popovich, Senator Mark Langford, Councilman Harry Gonzales, Allen Lee, Greg Robinson, USDA State Director Paco Yamin, Linda Jamail.

GALAEN PARK

Chemical release causes temporary shelter-in-plenne

By Allan Jamail

GALENA PARK — A chemical release at the Pasadena Refining in the 1100 block of Red Bluff on Monday, July 25, in Galena Park due to a sulfur dioxide release at the Pasadena Refining caused a shelter in place to be put in place. However, it was lifted off on Tuesday, July 26.

In Galena Park, the City Manager said that the shelter in place was put into place due to a chemical release that caused a toxic gas to be released. The gas was determined to be a sulfur dioxide gas that was released into the air. The gas is typically released from chemical spills or accidents.

The shelter in place was lifted on Tuesday, July 26, and people were allowed to go outside again. The gas was determined to be a sulfur dioxide gas, which is typically released from chemical spills or accidents.

AUSTIN, TX – July 24, 2016 – The Texas Department of State Health Services (DSHS) and citing families of American-born children have reached a mediated agreement with the Department of State Health Services (DSHS) and the Mexican government to allow American-born children to obtain a matricula consular for parents seeking to enroll in school, prove their identity, or receive all rights and privileges due to them by the 14th Amendment of the Constitution, while also ensuring that citizens cannot be forced to enter the workforce and taxpayers will benefit.

“We promote Entrepreneurship”

“With registration and lay-
AUSTIN – With about four months remaining in the 2016 hurricane season, the Texas Department of Public Safety (DPS) is reminding residents to evaluate their emergency plans and monitor weather forecasts for potential hurricanes and tropical storms. Hurricane season begins June 1 and continues through Nov. 30. Historically, August and September are the most active months during a hurricane season.

“A well-established hurricane plan and complete emergency kit can make a significant difference during hurricanes or tropical storms, and we urge Texans to take preventative steps for possible storms,” said DPS Director Steven McCraw. “As we approach the peak months of hurricane season, residents should remain vigilant and keep a watchful eye on weather reports and conditions in their area.”

All Atlantic and Gulf of Mexico coastal areas are subject to hurricanes or tropical storms. It is possible for a storm to severely impact our state, either prior to or without making direct landfall in Texas. Additionally, the rains associated with a tropical system have an extremely wide reach, so monitoring changing weather conditions during hurricane seasons is critically important for all Texans.

Hurricanes can cause catastrophic damage to coastlines, and winds can vary from 74 to 157 miles per hour (or higher). In addition, hurricanes and tropical storms can also cause dangerous coastal water conditions, including storm surges along the coast, and cause extensive damage from flooding.

Here are several measures residents can take now to prepare for potential storms:

• Assemble an emergency kit that includes essential documents, supplies and provisions.
• Review hurricane evacuation maps, and select a route for you and your family.
• Plan how all family members and pets will evacuate safely.
• Consider any special needs for individuals with disabilities or the elderly.
• Stay informed about changing weather conditions in and around your area.

If you or someone you know might need assistance during a disaster, please register for the State of Texas Emergency Assistance Registry (STEAR), a free registry that provides local emergency planners with information about individuals and families who require assistance in their communities. To register, contact 2-1-1 Texas, the state’s free 24-hour helpline. No matter where you live in Texas, you can dial 2-1-1 or (877) 541-7905 for community resources.

For more ways to prepare for the 2016 hurricane season, we urge Texans to visit www.texasprepares.org.

**Mobile app games like Pokémon Go present potential physical & cyber security threats**

[Page 4]

**Correctly Moving Yourself**

[NAPSI]—Many people these days are finding things into their own hands when it comes to moving to a new home. If you’re ever among them and you need to load and drive the moving truck, there are a few facts and figures that can help you save time, trouble and money.

1. **Trucks are taller, wider and may have up to 10 times more cargo than the average car.** Explained Don Mike, owner of Speedy Rental, Ponex. “You have to be extra time vigilant.”

2. **Don’t be blindsided.** Trucks also have blind spots—up to 50% on the sides and 200% at the rear. If you have a blind spot, check it twice.

3. **Don’t pack and drive.** Most truck rental agreements pose some restrictions like the Oregon Department of Transportation that prohibits the carrying or handling of explosives and other dangerous materials. Remove gas, gasoline and cleaning materials, flammable solvents and like. Check your rental agreement for a specific item.

**Sales tax holiday**

Texas Comptroller Glenn Hegar is happy to report the state’s Aug. 5 sales tax holiday, during which shoppers will save an estimated $92 million in state and local sales taxes.

The law providing for the special discount on various home-related expenses, such as tool supplies and backpacks priced below $100 from sales tax, saving shoppers about $100 they spend over that weekend. Lists of apparel and supplies that may be purchased free of the Texas state tax are available at TexasTaxHoliday.org.

**Texas jobs increase**

Texas added an estimated 17,205 nonfarm jobs in the month of July following the addition of 12,100 jobs in the June, the Workforce Commission announced on July 22. Texas has added jobs in 14 of the last 15 months, with the unemployment rate remaining at 4.5 percent in June, up slightly from 4.4 percent in May, according to the national average of 4.9 percent.

The Annenberg and Austin-based Business Roundtable recorded the month’s long-term unemployment rate among Texas MSA’s with not-seasonally adjusted rate of 3.3 percent, followed by the Sherman Denison and Lubbock MSA’s with rates of 3.9 percent in June.

**Appellate court strikes down Texas voter ID law**

AUSTIN — Texas voter identification law SB 7 is dead in the 5th U.S. Circuit Court of Appeals for the 5th Circuit ruled July 20.

In striking down the law passed by the Texas Legislature in 2011, the 5th Circuit said it disregarded and negatively interpreted the Voting Rights Act, which have imposed $2 billion in costs “without achieving any visibility changes in the election or any impact on voter participation.”

The 5th Circuit ruled July 20.

By signing up through one’s Google account, Facebook or Twitter, players are giving Niantic access to mostly emails, color or Google Docs, and opening doors for hackers to access other accounts.

Cecil Ray Dunn Jr., 64, of Crosby, Texas passed away July 24th, 2016. He was a business owner of Cecil’s Backyard Water Park.

He is preceded in death by his parents, and son, Buck and husband Allan, Dunn; daughter, Amaris by his parents, and son, Colby Rouse, Payden band Trent; granddaughter, Donna Shaw and husband Allan, Dunn; daughter, Amaris by his parents, and son, Gary Wallace and a host of extended family.

He was deeply missed by all who knew and loved him. A Celebration of Life will be held at 2 pm, Sat- urday July 30th, 2016, at the Knights of Columbus Hall, 1109 Crosby Dayton Rd., Crosby, Texas. Arrangements have been entrusted to Working White Funeral Home.

Darlene Burgess, kinesthetically inclined, was a happy guy who loved his family. He enjoyed telling stories and was a happy guy who loved his family.

He is survived by his beloved wife, Donna Shaw and husband Allan, Dunn; daughter, Amaris by his parents, and son, Gary Wallace and a host of extended family.

Darlene was never known to complain or even feel the least bit sorry for herself, even her dearest friends and closest family members. Darlene loved her family. Darlene lived her life to the fullest and always sought to make others feel important.

Diamond Jim: “How is Natural Yellow Gold made into White Gold or Rose Gold?”

Investing: A Marathon, Not a Sprint

Gold is a chemical element with the symbol Au (from Latin aurum; and the alchemical symbol of gold, A). It is a bright yellow dense, soft, malleable, and ductile metal with excellent conductivity and electrical and magnetic properties. It is one of the longest known chemical elements, and is solid under standard conditions. The metal therefore occurs in many elemental native forms, as ores, or in veins, in rocks. In nature, it occurs in solid solution with the native element (on an atomic and electronic scale) and also naturally altering with copper and palladium. Usually occurring in minerals as gold compounds, often with silver or gold infilling.

Gold, the densest of all metals, is a soft, malleable, and ductile metal with excellent conductivity and electrical and magnetic properties. It is one of the longest known chemical elements, and is solid under standard conditions. The metal therefore occurs in many elemental native forms, as ores, or in veins, in rocks. In nature, it occurs in solid solution with the native element (on an atomic and electronic scale) and also naturally interfering with copper and palladium. Usually occurring in minerals as gold compounds, often with silver or gold infilling.

The strength of gold-nickel-copper alloys is very similar to that of 18K gold, a phase in a gold-Au, Cu, and nickel-rich Cu-Co phase diagram, which forms highly disordered or supersaturated solid solutions. The alloys used in presently available gold-gold-nickel-copper alloys are generally produced by melting, followed by casting, rolling, cold working, and annealing. The metal therefore occurs in many elemental native forms, as ores, or in veins, in rocks. In nature, it occurs in solid solution with the native element (on an atomic and electronic scale) and also naturally altering with copper and palladium. Usually occurring in minerals as gold compounds, often with silver or gold infilling.

NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN AIR PERMIT

LEGAL NOTICE

The facility will emit the following contaminants: organic compounds, particulate matter with diameters of 10 microns or less and 2.5 microns or less, and benzene.

The application was submitted to the TCEQ on July 6, 2016. The application will be available for viewing and may be obtained at the TCEQ Houston regional office, and the Harris County Public Library - North Channel Branch, 15741 Wallisville Road, Houston, Harris County, Texas, 77071. The first day of publication of this notice is 30 days after newspaper notice is published.

The purpose of a public meeting is to provide an opportunity to submit comments or ask questions about the application. A public meeting about the application will be held if the executive director determines that there is a right of degree of public interest in the proposed application or if requested by a local legislator. A public meeting is not a contested case hearing.

If only comments are received on the application, the response to comments, along with notice of the executive director's action on the application, will be mailed to everyone who submitted comments or is on the mailing list for this application.

A person who may be affected by emissions of air contaminants from the facility is entitled to request a contested case hearing. If requesting a contested case hearing was filed by a group or an association, one or more members who have standing to request a hearing must be identified by name and physical address. The agency will only grant a hearing on issues submitted by you or others during the public comment period and not withdrawn.

Mail submissions can be made to the Executive Director, Texas Commission on Environmental Quality, 1310 Pecan Street, Austin, Texas 78701-3298. Public comments and requests must be submitted in writing. You may submit comments to the Commission electronically via the Texas Commission on Environmental Quality’s online form at the Texas Commission on Environmental Quality’s online form at the TCEQ website at www.tceq.texas.gov/about/comments.
