The Houston Symphony Community Concert series visited Northshore High School for a fantastic free concert on Thursday, October 9th. Directed by Robert Franz, the Symphony presented great works from Wagner, Tchaikovsky, and Gershwin that the audience loved. The Houston Symphony brings Class(ics) to North Shore.

Local residents visit with Hillary Clinton

Recently Linda and Allen Jamail visited with Democratic Party Presidential Nominee Hillary Clinton during her Houston visit. The Jamail’s both Texas Democratic Party Committee members were part of a small private gathering of Clinton supporters committed to the historical presidential candidacy of Hillary at the first female presidential candidate of a major political party in the United States. Linda Jamail, Honorary Hillary Clinton and Allan Jamail attended the Houston Port Authority, present a plan to Council that shows new harbor master plan. The Jamail’s both Texas Democratic Party Committee members were part of a small private gathering of Clinton supporters committed to the historical presidential candidacy of Hillary at the first female presidential candidate of a major political party in the United States.

San Jacinto College reopening Lehr Library

New building blends old with new

The 42,718-square-foot Lehr Library is the new library has 42,718-square-foot which also includes a new library and other departmental areas. GPISD Education Foundation honors first “Beyond the Book” Winners

Ruby Chavez
Angela Walker
Laina Barajas

Galena Park ISD’s Education Foundation was created and exists to monetarily support students and programs within Galena Park ISD through scholarships and teaching grants. To date, over one million dollars in scholarships and grants have been awarded by the Foundation, and creation employees have been acknowledged at the district’s annual Teacher of the Year Gala, which honors the district’s top generators. The Foundation also seeks to acknowledge other employees who go above and beyond their core duties to teach children and foster a love of learning in GPISD students. This year, the Foundation recognized three educators for the first Annual “Beyond the Book” award as a result of their dedication to excellence and for the personal and professional growth they have created for students.

This year’s winners were Angela Walker, Houston Elementary Teacher; Laina Barajas, North Shore Senior High School Teacher; and Ruby Chavez, MacArthur Elementary Paraprofessional.

GPISD hosts Middle School Pentathlon

Students from Cunningham, Galena Park, North Shore, and Woodland Acres Middle schools competed in the district’s Pentathlon recently. This year’s theme was India, and the students spent much of the school year studying different forms of information over the topic. Tests were taken in English Language Arts, science, math, social studies and fine arts. The students also competed in a separate event, the Super Quiz. Those from North Shore 7th grade and Galena Park 8th grade teams walked away victorious. North Shore Middle School took home the overall team trophy while earning the Individual Division Champion award for each of the three divisions to both grade levels. The event was educational, and the students and coaches are already looking forward to starting the study on next year’s theme.

Restaurant Guide

Great Food, Dine In or Take Out

Heavenly Choices

Restaurant

Heavenly Choices, 1125 Texas, 77015

Heavenly Choices is located at 1125 Texas Blvd. in Houston, TX 77015. They offer a variety of dishes, including Mexican and American favorites, as well as vegetarian and gluten-free options. C. E. King Middle School students get lessons in Tech by Best Buy’s Geek Squad Academy

Some students from Sheldon’s C. E. King Middle School started off their summer with Best Buy’s Geek Squad Academy. This is a program that helps teach students about technology in an interactive way. The 4-day event is made up of numerous 30-minute classes that teach students about things like Photography, Film Production, Digital Design, Digital Music Creation, 3D Design, Digital Photography and Film Production, and Music Production and Film Script classes. The Geek Squad Academy was started nearly 10 years ago in Chicago and has since evolved into so much more. It’s nationwide. We have 30 camps this summer,” Wargolet said.

The event came to the middle school in late June, and the students were excited. School teacher, Sofia Luna, “I started contacting the community to see how we could expose our kids education,” Luna said.

In her search, Mr. Luna found the event and attended them. He filled out an application for a few minutes later, she found out that the middle school was selected to host a Geek Squad Academy camp this summer.

“I think it’s a great opportunity for our kids. For kids to be able to get hands-on in the things that are not out of reach anymore in schools is really important,” said Mr. Wargolet, Field Liaison/Field Manager, Geek Squad Academy.

The event is made up of numerous opportunities that helps teach students about technology in a fun and easy way. This year, this summer, there are three very special weeks that were handed by three special names: Luna Brung and Lisa Avenue.

**The ABCs Of ESAs: What parents need to know**

- **Individual public school classes and programs.** The funding can go to several education providers of choice, and this could become as important as online learning professions.
- **This level of funding helps bring community into the education system.** The 21st century and that means it is possible for the entire family to be a family of learners.
- **Parents can also “sell” ESPs as one might think.** They can be discussed with their children and letting that become a part of the family. Parents and education savings accounts (ESAs) are the best mechanism to date for funding independent learning for students.

Parents of families to completely take their children out of school and fund their students instead of physical school buildings and letting that funding follow children to any education provider of choice. They do not have to go to a charter school or traditional public school. They have that freedom, and that freedom can be exercised.

For example, in Texas, parents can withdraw their children from school, fund their children, and spend 80 percent of the amount. The state would go on to make a per-pupil payment (known in Arizona as an allotment) to the school they have also opted out of. Texas is known in Arizona as an example of what can be done. School choice allows those funds to go to more than just school tuition and fees.

- **How to start an ESA:**
  - **In-state tuition and fees**: Sponsors, such as those listed below, hold education savings accounts. These providers are bound by the foundation's own educational programs. Florida supports the idea that the education is the best investment for the future.
  - **What to do next:**
    - **In-school tuition and fees**: School choice is a mandate, and the mandate is to achieve academic achievement, and we stand by student safety.
    - **How to start an ESA:**
      - **In-state tuition and fees**: Parents-and-educators.org is available to help parents and students.
      - **In-school tuition and fees**: Parents-and-educators.org is available to help parents and students.

**Babin Votes To Restore State Flexibility Over Ozone Standards**

Washington, DC, U.S.A. – U.S. Congressman Pete Olson (TX-26) on Wednesday, June 8, introduced the Ozone Standards Flexibility Act of 2016 (H.R. 4775), legislation that would recommit to allow states to pursue cost-effective and practical ways to implement the National Environment Protection Act (NEPA) and the National Ambient Air Quality Standards (NAAQS) in their states' unique circumstances. As the representative for the third most rural congressional district in the U.S., Rep. Olson spoke about the importance of flexibility in the implementation of NEPA and the NAAQS in his hometown of Hinton, Iowa.

The DSHS is advising travelers demands vigorous preventative programs, and that’s how we keep our emergency management system honed and ready to assist and local partner should sign a significant storm threat “Tornado.”

**Waterway gains status**

The U.S. Department of Transportation has granted the Texas Department of Transportation’s application to designate the waterway from Brownsville to Corpus Christi on the Mississippi Highway 69, TXDOT said.

According to TXDOT, the designation means the waterway can be used by federal government to operate projects along the waterway that would help reduce roadway congestion or improve waterway efficiency. Texas Transportation Commissioner Joe Mont- ley said, “We are happy to incorporated to shi to the future of waterway transportation. The Pass” and the designation to the Mississippi Highway 69, waterway freight system, where it can be seen to do efficiently transport cargo and passengers to and from rural America, I think the EPA’s job is to do about it.”

AUSTIN — Greg Abbott on June 9 practically announced that the White House has issued warning conference call for emergency personnel to discuss the Zika threat and what to do about it.

The Senate Commerce, Science and Transportation Committee was to discuss the Health and Human Services (HHS) budget proposals for the Department of Health and Human Services (HHS). The conference call is to discuss the response and the Department’s funding.

**Governors confer about containing spread of Zika**

The health care industry is now in the crosshairs of Washington, DC. The Senate Finance Committee is in charge of health care funding and has an opportunity to make major changes to health care funding. But it’s a shift that has its own opponents. The question is whether the Senate Finance Committee will do what the health care industry wants or what the health care industry needs.

**The Affordable Care Act has helped millions of people in rural America access health care. By Sylvia M. Burton. “As someone from rural America, I know how important these gains in coverage mean to rural citizens.” In the case of the Affordable Care Act, it has made health care more affordable.”

The DSHS posted this information about the mosquito-borne West Nile virus, known to be transmitted by mosquitoes.

West Nile is here, too. On June 7, the CDC posted information about the mosquito-borne West Nile virus, known to be transmitted by mosquitoes.

The agency said the state’s health commissioner announced a case of illness that was diagnosed in a local resident of El Paso County.

In 2015, some 275 human cases of West Nile illness were reported in Texas, reported increasing case in 16 states.

**The funding can go to several education providers of choice.** The funding can become as important as online learning programs. The funding can go to several education providers of choice, and this could become as important as online learning programs.
Galena Park High School named All State Teens Serving Texas Finalist

Galena Park High School senior Jocelyn Yanez was recently named as one of the All State Teens Serving Texas Finalist as a result of her countless hours of volunteering and service. This award is sponsored by the Texas Association of Secondary School Principals (TASSP), which recognizes high school seniors who have demonstrated excellence in the area of service, leadership and personal accomplishment. Students are asked to describe their contributions to these areas in a two-page essay. Thirty students will be recognized for this award, the scholarship winners and 25 finalists. Winners will receive a $500 scholarship and finalists will receive plaques.

On Sunday, May 15, 2016, Sr. Angela Thelma Williams took a moment to enjoy lunch and celebrate a successful school year with the students from her 2015-2016 Student Advisory Board. These students represent the student body from their high schools and are selected by their principal based on leadership attributes qualities. Dr. Williams meets with the student representatives several times throughout the school year to discuss current events and issues as they pertain to GOS. January is the annual students’ voting time, and students are asked to attend classes with as assigned buddy and observe similarities and differences between their campuses. For the last meeting of the year, students from the City Gala College Prep School, John W. Brister High School and Galena Park Junior High, met at Dr. Williams’ house, where they enjoyed a field trip was eye opening and many questions were asked about the program, student life and future plans. Upon completion of the tour, students met Dr. Williams for lunch and fellowship.

Mary “Betty” Elizabeth Pierce

Mary “Betty” Elizabeth Pierce, 90, of Jacinto City went to be with our Lord on June 8, 2016 surround- ed by her family. She was born October 20, 1925 in Kigs, Texas to parents Charlie and Mary (Bingham) Pierce. Betty was a retired Dental assistant from North Shore Port Credit Union for 60 years and enjoyed being a part of their community where they raised their family.

Joe Richard Silva, Sr.

Joe Richard Silva, Sr., 60, of Houston, Texas passed from this life into his heavenly home on June 6, 2016 at the age of 60. Joe was born September 16, 1955 in Jacinto City, Texas to parents Antonio and Remedios Silva. He retired from Pepsico after 40 years, which he worked as an office technician. He is survived by his father and by his wife of 36 years, Irene Silva and by Daugh- ter, Teresa Silva Renfeud and by brother, Tony Silva and sisters, Nina, Teresa and Mercedes Chapman. He is survived by son, Joe D. Silva, Jr. & wife, Deborah, by daughter, Sandra Kay Silva Stil & husband, Robby Stil, by granddaughter, Kelly Silva and by great-grandchildren, Lucas and Jordan Stil. Mr. Silva was a member of St. Rose of Lima Catholic Church in Baytown, Texas and was a member of the Knights of Columbus.

GP Council, continued from page 1

group of Byrnes and board member number of the Port of Houston Authority, pre- sented a plan to Council that would build new walk- ways and bicycle light- ing between Jim Hogg and Holland Avenues.

The Port has offered to pay part of the cost, ask- ing for a small contribution from the city. The project will be implemented in two phases, and in the other project, the walking/jogging/biking trail completely surrounding the Port’s property will happen. Dr. Galvan said Council also heard a proposal from Attorney General’s Office of the Port Park Redevelopment Corp. and attorney Jeff Mott LLP to take over delin- quent tax collect- ions for the city, which they approved.

Next, the Council heard a presentation from CenterPoint Energy, which replaces all the stress- ees in the city with new more efficient 1,4E typ- e Funturms. Michael Hurd of CenterPoint explained how the change would be made at no cost to the city naturally, with a small monthly charge that will be offset by re- duced energy costs. There will be no change in rates, the city, he said, and oil will be replaced and another 3,000 are added.

In other business, Jonathan Castrejon of Heights Renewable Energy pre- sented a program to test and place trees in, or plant trees to reduce the amount of trees.

Give Your Children the Gift of (Financial) Knowledge

It’s almost Father’s Day. If you’re a dad with young children, you can enjoy the moment and maybe even a barbecue. But, of course, your greatest reward is spending time with your kids and watching them grow. In return, you can give them a gift—the gift of knowledge.

First, however, you should get your children interested in financial planning. You might explain to your kids that you want to buy a certain item, but you are waiting for it to go on sale. Or, it’s a particularly big-ticket item, like an ultra high-definition television, or a movie ticket item, like an ultra expensive movie. You might also explain that while these short-term gains are exciting, and maybe even fun to follow, investing is a virtually a long-term endeavor, and the best returns often look modest. You might even simulate the investment process by letting them put in, say $50 every week until you can. You might even simulate the stock market, and add or subtract to the pile. To make this more exciting, you can point out how these developments have pushed up the company’s stock price.

Second, you can talk about investment. To help get your children interested, you might point out that they can actually own a piece of companies with which they are already familiar. Companies that make the games they play, the food they eat. In fact, you could simulate the investment process by letting them put in, say $50 every week until you can. You might even simulate the stock market, and add or subtract to the pile. To make this more exciting, you can point out how these developments have pushed up the company’s stock price. You might even simulate the investment process by letting them put in, say $50 every week until you can. You might even simulate the stock market, and add or subtract to the pile.

Third, you can talk about 401(k) or other retirement plans or how matched contributions to a retirement plan can be given them a valuable boost. They may well see how much faster their money grows when you match their contributions, say, 50 cents on the dollar. You might even simulate the investment process by letting them put in, say, $50 every week until you can. You might even simulate the stock market, and add or subtract to the pile. To make this more exciting, you can point out how these developments have pushed up the company’s stock price.

Fourth, you can talk about saving for investments or for college. You might explain to your children how saving for investments or college is a high-priority. But that you are putting away some money each week until you can. You might even simulate the stock market, and add or subtract to the pile. To make this more exciting, you can point out how these developments have pushed up the company’s stock price.

You can talk about how the economic system works. You might explain to your children how saving for investments or college is a high-priority. But that you are putting away some money each week until you can. You might even simulate the stock market, and add or subtract to the pile. To make this more exciting, you can point out how these developments have pushed up the company’s stock price.

Finally, you can talk about how to save for college. You might explain to your children how saving for college is a high-priority. But that you are putting away some money each week until you can. You might even simulate the stock market, and add or subtract to the pile. To make this more exciting, you can point out how these developments have pushed up the company’s stock price.

You can talk about how the economic system works. You might explain to your children how saving for college is a high-priority. But that you are putting away some money each week until you can.
