Galena Park Mayor replaces Police Chief Mata bringing controversy to city

On the first day of the 2017 Houston Rodeo, it was thrilling that Highlains Rotary had a speaker from the organization. Gary McHenry, the Rotary Club president, was the master of ceremonies for the Rotary Club's annual Country Ball. He was a great choice to introduce the rodeo speakers for the evening. The city of Galena Park, the location of the rodeo, was also honored. The city received a special award for its outstanding work in 2016.

Buddy Martin, the Galena Park mayor, thanked McHenry for his presentation and introduced the star attraction of the evening, the Houston Livestock Show and Rodeo. The event featured not only the rodeo but also a variety of exhibits, including a petting zoo, kids zone, and street fair.

The star attraction of the evening was the rodeo. The event featured not only the rodeo but also a variety of exhibits, including a petting zoo, kids zone, and street fair. The rodeo featured a variety of events, including bull riding, bronc riding, and barrel racing.

The rodeo was a huge success, with many people attending the event. The Houston Live- stock Show and Rodeo is one of the largest events in the city, and it is known for its high-quality performances.

The next day, the mayor of Galena Park, Mata, was under fire for his handling of the rodeo. Mata was criticized for his lack of professionalism and his inability to control the event. The mayor was also criticized for his handling of the rodeo, which was marred by several incidents, including a fight between two rodeo riders.

The mayor's handling of the rodeo was a major source of controversy, and it continued to dominate the news in Galena Park. Mata's leadership has been called into question, and his future with the city is uncertain.

Despite the controversy, the rodeo was a huge success, with many people attending the event. The Houston Livestock Show and Rodeo is one of the largest events in the city, and it is known for its high-quality performances.

Galena Park ISD students come together for the Multimedia Festival

Galena Park ISD’s Technology Department hosted its 15th annual Multimedia Festival on Thursday, March 9. The festival, which included grades 6-12, celebrated students’ hard work and accomplishments by showcasing their technology projects.

During the festival, students were able to interact with the coding programs and robots, which were demonstrated by the Team Robotics from Galena Park High School. Students were tasked to students for their excellent performance in the following multimedia projects: categories included coding, graphic design, choice challenges and 3D digital modeling. The year’s coveted medals were designed by Samantha Ghemne, a student at Conrath Middle School.

The Multimedia Festival is a team effort and would not be successful without the help and support of GPISD parents, teachers, administrators, cabinet members, board members, North Shore Senior High, Galena Park High School and the GPISD technology team.

Sheldon ISD Board recognizes Educators of the Month for February

Members of the Sheldon ISD school board recognizes the district’s educators of the Month for February at their regular board meeting in the Ney Administration Building Board Room.

Huberty Files School Finance Reform Bill

AUSTIN—House Public Education Committee Chairman Dan Huberty is sponsoring a bill that authorizes the state to appropriate up to $2 billion for school finance reforms in the next biennium. In addition, Huberty said the bill would allow districts that pay Recapture to file an appeal for state transportation funding for the first time.

Huberty’s bill would also:

- Provide weighted funding for students with dyslexia.
- Provide a teacher and principal grant program to help districts affected by the expansion of Additional State Aid Tax Reduction.
- Help students across the board, including those who attend charter schools. “Charter schools, Huberty said. “We are beginning this process to help our school finance system and helping struggling districts get the increasingly high demands that have put them under pressure.”

Last year, the Texas Supreme Court ruled that the state’s school finance system was unconstitutional. In a strongly worded follow-up, the court ordered Speaker Joe Straus encouraged legislators to continue working on school finance reform.

“Our school finance system is broken,” Huberty said. “The Texas image and the image the state presents to students and parents is that we need to do a better job of funding our schools properly and providing the care our children need.”

The bill would allow districts to prioritize funding for children in foster system.

State Sales Tax Revenue Totaled $2.4 Billion in February

AUSTIN—Texas Comptroller Glenn Hegar said today that state sales tax revenue was $2.4 billion in February, 4.4 percent more than in February 2016. “Growth in sales tax revenue was the result of increased sales from most sectors of the economy,” Hegar said. “Sales tax collections from motor vehicle sales and retail, construction, services and wholesale trade increased significantly.”

Total sales tax revenue for the three months ending February 2017 was up 7 percent compared with the same period in 2016. Sales tax revenue is the largest source of funds for the state, accounting for approximately 56 percent of all tax collections in fiscal 2016. Motor vehicle sales and rental taxes, motor fuel taxes and oil and natural gas production taxes are also large revenue sources for the state.

In February, Texas collected the largest sales tax revenue from those taxes:
- Motor vehicle sales tax—$777 million, up 11 percent from February 2016; and
- Motor and natural gas production taxes—$227 million, up 11 percent from February 2016.

The increase in sales tax revenue is due to increased retail and increased consumer spending in February 2017, which resulted in significantly higher tax collections during that month.

March 9, 2017

House, Senate approve bills to protect children in foster system

WASHINGTON, D.C.—U.S. Rep.$(591x688)BryanBabin, a member of the House Committee on Transportation and Infrastructure, approved a funding bill today that it is critical for the continued success of the U.S. Gulf Coast through the federal investment over a 10-year period and in the states of Baytown, Texas, Accident to Beaumont. The new projects are expected to create more than 43,000 high-paying American jobs across the region. “This is more good news for the people of Texas and the United States,” said Babin. “The decision by ExxonMobil to invest another $20 billion in the United States demonstrates the commitment to the American economy. Jobs will be created and thousands of people from the billions of dollars will be spent over the next years. The Trump Administration continues to create a plan for rebuilding America and we are proud to be a part of it. Today’s announcement gives us hope that the day we’ve been waiting for will come to fruition for our Texas Gulf Coast.”

In passing HR 6 and HR 9, the House has taken the “important step toward protecting our coast and its resources and helping our citizens.”

“Today’s announcement not only gives us hope that the day we’ve been waiting for will come to fruition for our Texas Gulf Coast,” the Texas Department of Energy and Natural Resources said in a statement Monday. The increase in sales tax revenue is due to increased retail and increased consumer spending in February 2017, which resulted in significantly higher tax collections during that month.

March 9, 2017

HIGHLIGHTS

STATE CAPITAL

Hegar said.

State tax revenue for the largest source of revenue for the state’s general fund, accounting for more than one-third of all tax collections in fiscal 2016. The total state revenue for the three months ending in February 2017 was up by 2.3 percent compared with the same period in a year ago, Hegar said.

Hegar also said.

DHS gives Zika

The U.S. Senate on March 2 confirmed Rick Perry as secretary of the Department of Energy. Americas first energy secretary and the technology to utilize them. Perry told the Senate he has met with the leaders and the stakeholders at the National Security Council to discuss the Zika virus. Senate OKs ‘con-con’

Meanwhile, on March 2, the Senate OKs ‘con-con’

The Senate, according to Senate Majority Leader Mitch McConnell, is “the ultimate guardian over entire states”. Senate Bill 21, sponsored by Sen. Brian Birdwell, R-Granbury, would allow eight other states that have passed similar laws to enter it. Any amendments applicable to the procedure to be added by the Congress of March 3, 1879. Published 50 weeks per year, on Thursday, by Grafikpress government publications on contract. Call for information to 713-977-2555.

Presents E-Week at Gentry

Chevron Phillips Chemical Co. recently worked with 7th-grade science classes at Gentry Junior School during Engineering Week (E-Week).

The group from Chevron Phillips Chemical discussed different types of engineers that work in design, production and installation of large industrial plants, office and around the world. They described the growth of the Cedar Bayou plant in Baytown and features, such as ethylene, propylene, polyethylene, and what they are used to produce. The junior scientists found out that many of the unimaginable products that they use every day, such as HDPE and LDPE, are used to make items familiar-sounding products.

The junior scientists found out that many of the unimaginable products that they use every day, such as HDPE and LDPE, are used to make items familiar-sounding products.

The educational part of the competition benefits the Chevron Phillips employees as well as the students. "It’s a great opportunity to meet engineers who work at our plants and around the world. “Many of the professionals who work for kids, educators, and parents,” Gore said. “I want to be a chemist and do that for one year, just to off college engineers to middle school students we can inspire students to see themselves as future engineers,” said Heather Bostock, community relations representative for Chevron Phillips Chemical in Baytown.

"Many of the professionals who work for kids, educators, and parents,” Gore said. “I want to be a chemist and do that for one year, just to off college engineers to middle school students we can inspire students to see themselves as future engineers,” said Heather Bostock, community relations representative for Chevron Phillips Chemical in Baytown.

Alexandrite is a rare and unique gemstone that is a member of the chrysoberyl family, along with chrysoberyl and cat's eye. Its name is derived from Alexander II of Russia, who was given the first known Alexandrite by the Russian court in 1834. This gemstone is notable for its ability to change color, which is known as dichroism. When viewed from different angles, an Alexandrite can appear to shift from one color to another. This phenomenon is due to the presence of tiny chromium ions within the gemstone's crystal structure. The color change is most pronounced when viewed in incandescent light, such as a lamp or candle flame. When the light source changes, the gemstone's color can transform, making it appear more green or red.

Alexandrites are found in several locations around the world, including Russia’s Urals Mountains, Sri Lanka, East Africa, and Brazil, but they are typically rare and valuable. The gemstone is particularly rare in Russia, where it was first discovered and named. It’s prized for its unique color-changing properties, which make it a sought-after gemstone for collectors and jewelry enthusiasts.

Because of its rarity and color-changing properties, Alexandrite is often used in high-end jewelry, such as rings, earrings, and pendants. It is also used in the jewelry industry to create stunning color-changing effects. In recent years, the demand for Alexandrite has increased, making it a valuable and sought-after gemstone.

Alexandrite is also known for its durability, with a hardness of 7.5 on the Mohs scale. This makes it a popular choice for jewelry because it can withstand normal wear and tear. However, it’s important to handle and care for Alexandrite with care to ensure its longevity. When worn, the gemstone should be removed before getting into a swimming pool or ocean, as chlorine and saltwater can damage the gemstone. It’s also important to avoid wearing it near strong magnetic fields, as it may be affected by the magnetic properties of some materials.

Overall, Alexandrite is a rare and valuable gemstone that is highly prized for its unique color-changing properties. Its beauty and rarity make it a popular choice for high-end jewelry, and it continues to be a sought-after gemstone for collectors and jewelry enthusiasts around the world.

North Channel Chamber welcomes new member

Recently the North Channel Chamber of Commerce welcomed new member Fresenius Medical Care - Northeast Houston Dialysis with a ribbon cutting.

The North Channel Chamber of Commerce held a ribbon cutting for Garcia Law Offices (Accidentes De Auto) and welcomed them as new members.

Chamber topic: Workforce Development: Engaging Emerging Talent

Specialists in the development of young potential talents, to match them with desirable jobs in industry, presenting three views of the Chamber of Commerce.

Dr. Allatia Harris, of San Jacinto College, said that the Houston economy is driven by four industries: the Port of Houston, Space, Petrochemicals, and the Medical Center. These are looking for talent to join their work. She said new industries, like natural gas, ask the question “Is workforce available?” before locating in a region. San Jacinto College has a program known as Mind Trekkers to engage STEM students. Denise Smensny presented “Dream It. Do It.” This program means to make industrial work look attractive, and present the types of skills needed, and their high rates of pay. In addition to the petrochemical field, these jobs can be found in transportation, construction, and welding. Sarah Umaña, Executive Director of opportunities for women, summarized an annual Women’s Conference held every year in February to highlight jobs, and apprenticeships.

Chamber topic: Workforce Development:

Spring Coloring & Painting Contest
