The Houston District of the Texas Department of Transportation (TxDOT) is currently holding public meetings in neighborhoods at four locations along the I-10 corridor.

These meetings are called "open house formats (no formal presentations)" and are meant to show the public areas under study, and to receive comments from persons interested in interacting with the planning process. I-10 is under study because it carries a high volume of auto and commercial traffic, and this is expected to increase in the future due to activity and expansion in the petrochemical industry on the East side of Harris and Chambers County.

The study is known as a PEL (Planning and Environmental Linkages) study, required by the federal government. The purpose is to gather feedback during planning to inform the environmental review process, including the National Environmental Policy Act. The study encompasses I-10 East from I-69 near downtown Houston, to State Highway 99 (Grand Parkway) in Chambers County.

Public meetings were held last week, and this week, at Barbers Hill High School, Goose Creek Memorial High School, Channelview High School, and Mickey Leland College Prep Academy.

The format was to show large photos and maps of the highway, broken into sections, with drawings that indicated environmental concern, and aerial photos displaying current road alignments and cross-sections. Forms were provided for public comments to be submitted. For anyone missing the meeting but wanting to see the information, it is available at the TxDOT offices on Washington Avenue in Houston. It is also on the internet, at the following address:

**Police Substation, Continued from Page 1**

Police substation in the city
Mayor Maya said, “En- hancing the safety and se- curity of our residents is enhancing the safety and se- curity of our residents is enhancing the safety and se- curity of our residents is enhancing the safety and se- curity of our residents is enhancing the safety and se- curity of our residents is”

Chamberview ISD Board of Trustees are meeting about the long police re- sponses to their subdi- visions. Today with the support of Commissioner Rodney Chersky and May- or Maya have taken ac- tion that provide the immediate police presence on a crisis a call for the police.

Photo: “The police officers stationed and working out of the substa- tion will patrol the neighbor- hood cutting down on crimes such as home bur- glaries and other thefts. Because of the increase in property values the sub- station and maintaining the police substation will be made without a tax increase”

Commissioner Rodney Chersky said, “With the opening of the new Galena Park Police Substation, this is just another engag- ing example of Mayor Maya’s commitment to the citizens and service to our reality to the citizens dedicated to our citi- zens of our abilities for as long as we serve in office.”

Moya’s commitment to the community to the best of our abilities for as long as we serve in office.”

Galena Park. We will re- turn it into a functional property values the sub- station will patrol this neigh- borhood cutting down on crime and save citizens the commu- nity.”

Police have been at the com- munity to the best of our abilities for as long as we serve in office.”

Galena Park and North Channel have come to enjoy a delicious meal, ball and other prizes.

The movie was served by Mayor Maya, Council members Allen Lee, Greg Robinson, Carmela Garcia, Fire Chief Rebecca Rodriguez Montalvo, Constable Chris Diaz, and others for your opinion.

Leading contenders on the Republican ballot are US Senate Ted Cruz vs. 4 other candidates, US House Dist. TxDOT holds I-10 east Meetings,
CONTINUED FROM PAGE 1

TxDOT's I-10 East project would include the city areas of Houston; Jacinto City; Baytown; and Mont Belvieu. At a high level, a PEL study:

- Identifies transportation issues
- Develops the need and purpose for proposed improvements
- Helps inform planning decisions through public feedback
- Streamlines the project delivery process for NEPA
- Identifies environmental constraints, issues and potential future projects

PEL Timeline and Process
Following is a high-level timeline; ongoing agency and stakeholder involvement occurs throughout the entire PEL process.

Phase I: Spring 2017 - Summer 2018
- Conduct data collection
- Analyze existing conditions
- Determine corridor needs and concerns
- Identify vision for the corridor with community input

Phase II: Fall 2018 - Summer 2020
- Develop and screen conceptual ideas and alternatives that support the corridor vision
- Consider viable alternatives
- Present PEL findings

After the PEL study process, the NEPA process will then be initiated and additional public involvement will be required and planned.

The whole planning, environmental review, engineering, and construction for the work is expected to take at least 10 years.

AUSTIN — Gov. Greg Abbott today issued an emergency proclamation declaring a Disaster Declaration for Texas counties affected by Hurricane Harvey. The proclamation covers 58 counties, with the list to continue to be updated as needed to recover and respond after Hurricane Harvey. There are currently more than 60 counties included in the state disaster declaration.

Hurricane Harvey declaration must be renewed by the governor 30 days for assistance to remain available. Governor Abbott will continue to order the mobilization of state assets as they are needed throughout the recovery and rebuilding efforts.

GOVERNOR ABBOTT EXTENDS DISASTER DECLARATION FOR TEXAS COUNTIES IMPACTED BY HURRICANE HARVEY

"As a state and nation we are deeply saddened by the devastation of Hurricane Harvey," Abbott said. "The work of recovery and rebuilding continues and we must be there for the community as they recover and get back on their feet after Hurricane Harvey. We have asked all counties impacted by Hurricane Harvey to prepare for immediate mobilization of state resources as the governor declares a disaster and makes requests to the Federal Government for assistance. The state disaster declaration must be renewed by the governor 30 days for assistance to remain available. Governor Abbott will continue to order the mobilization of state assets as they are needed throughout the recovery and rebuilding efforts.

"These declarations are in effect for 180 days and counties may request to extend assistance beyond that period as recovery efforts continue. We are proud to be here for our neighbors and will continue to work with them until the job is completed," Abbott said.

Hurricane Harvey hit Texas on Aug. 25. It caused more than $125 billion in damage to Texas, and is considered one of the costliest natural disasters in U.S. history.

"We are grateful for the support of Congress and the Federal Government," Abbott said. "I would like to thank President Donald Trump and Vice President Mike Pence for their support of our recovery efforts in Texas. These declarations are a necessary step in the recovery process and we will continue to work with the Federal Government to ensure that our citizens receive the assistance they need to recover.

What we suffer now is nothing compared to the glory He will reveal to us later. ROMANS 8:18

Who is the greatest missionary of all time? Would you say Paul? Many would, but there is One greater even than Paul. That would be Jesus. When Jesus was here on earth, He taught His disciples to go into all the world and preach the Gospel. He was simply taking to them what He had been doing all along.

Because of our need, Jesus accepted a mission. He chose to leave His home in Heaven and come down to Earth, to become part of our culture and in us in a very real way, so that He could give us the Good News. Those who accepted His message changed; their lives were never the same again. And those who had been following Him most closely did as He commanded and set about changing the world.

Through thousands of years, that message remains the same. As Christians we are all told to go into all the world and share the Gospel, to offer others the same hope that we have come to know the wonder of. Through a relationship with God Himself. In truth, we are all followers of Jesus, entrance into a mission every day of our lives.

If we truly have the love of God in us, we should want to share that love with everyone around us. We should be able to see the world through Jesus’ eyes and be sensitive to those in need around us. Does the man beside you see the beauty of God in His eyes? Maybe he just needs to be reminded that Jesus loves him, that God cares. Is your neighbor sick in the hospital? A visit could be just what they need. We are, as it turns out, the hands and feet of Jesus.

Of course, as individuals we can’t each literally cover the whole world. This is where monetary missionary support comes into play. My monetary donation to missionaries in Mexico helps provide an orphanage for orphans, supports language missionaries who go out into areas that have never had a chance to hear the Good News and the training of Pastors and the raising up of new leaders. Many would, but there is One greater even than Paul. That would be Jesus. When Jesus was here on earth, He taught His disciples to go into all the world and preach the Gospel. He was simply taking to them what He had been doing all along. He had been doing all along.

Feinberg headlines College’s annual Lyceum lecture event

HOUSTON – Professor Danielle Feinberg will serve as the keynote speaker for the 2018 University of Houston’s Santa Clara University’s “Discovering Your Potential” Lyceum Lecture event, Thursday, Feb. 28, at the Santa Clara University College of Science.

This year’s event will focus on the College’s eight areas of excellence: Arts and Humanities; Communications and Media Studies; Business, Construction, Industry, Manufacturing and Transportaiton; Education, Health Sciences, Public Safety and Human/Consumer Services, Science, Technology, Engineering and Mathematics; and Social and Behavioral Sciences.

Co-hosted by the Santa Clara University College of Science, the event will feature a morning session and afternoon session with faculty speakers from a wide range of disciplines. Feinberg will give her keynote speech at both sessions.

Feinberg is the director of photography for animation at Pixar Animation Studio. She began her career at Pixar in 1997, after receiving a master’s degree in computer science from Stanford University. As Pixar’s first entry-level position was on the movie “A Bug’s Life,” she is redefining the leadership model for artists. She went on to light many of Pixar’s films, including “Toy Story 3,” “Incredibles,” “Finding Nemo,” “Ratatouille” and “WALL-E.” Feinberg’s first movie directing the lightening of director photography was “Finding Dory” in 2016.

Feinberg is also known as a “Crown Gold.” This term is often used to refer to gold that is more than 18 karats, and is considered to be high purity gold. The purity of this type of gold is usually 75% (9 carats) or more. The term “Crown Gold” is used to describe jewelry that is made of high purity gold.

The alloys used in jewelry making can contain nickel, which can cause an allergic reaction when in contact with the skin. This is especially true for people who are allergic to nickel. White gold is an alloy that contains nickel, and is often used in jewelry making because it is a harder and more durable metal than gold alone.

White gold is often used in jewelry making because it is a harder and more durable metal than gold alone. However, it is still possible for a person to have an allergic reaction to nickel, which is often used as a secondary bleaching agent in white gold alloys. This is why it is important to be aware of any potential allergens when choosing jewelry.

In conclusion, gold is a highly malleable and ductile metal, which makes it ideal for use in jewelry making. It has been used for centuries in jewelry making, and continues to be a popular choice for making jewelry today. However, it is important to be aware of any potential allergens when choosing jewelry, especially if you have a history of skin allergies.

The Nadolney family originally owned the land where the farm is located, and many of the original buildings on the farm are still standing. The original land for the farm was donated to View High School. Many of the original buildings on the farm have special meaning to the Neese family, and have become home to many residents in the area. Some of these buildings have been restored and are now used as a community center.

One thing I have always noticed is that the parent who has children in elementary school make every effort to participate in activities at the school and often the number of documented contacts a teacher has with parents is the measure of the extent to which the parent is interested in their child’s education. However, in the rush to teach our children the everyday standardized tests, we have missed out on teaching the children to have a personalized education. Instead of just listening to someone who lacks a discriminatory name. What this teacher learns the history. I suggested that the does not have anymore father that knows the history, perhaps call to Frank Maloney who still has a real estate company in the area and the former of film "Brave" and the 2018 Oscar-nominated "Coco."

One other point - I have served as director of photography for 30 years. I have served as director of photography for "Finding Nemo," "Ratatouille," and "WALL-E." Feinberg’s first movie directing the lightening of director photography was "Finding Dory" in 2016.

In conclusion, gold is a highly malleable and ductile metal, which makes it ideal for use in jewelry making. It has been used for centuries in jewelry making, and continues to be a popular choice for making jewelry today. However, it is important to be aware of any potential allergens when choosing jewelry, especially if you have a history of skin allergies.

MEDICAL WEIGHT MANAGEMENT & WEIGHT LOSS SURGERY EDUCATIONAL EVENT
TUESDAY, FEBRUARY 27, 2018 | 6-7 P.M.
HOSPITAL CONFERENCE BOARDROOM, 4401 GARTH ROAD, BAYTOWN TX 77521

Dr. Laura Choi, medical director of the Weight Management Center, will provide information on the benefits of using medical weight management to maintain personal goals for patients who want to lose weight with and without surgery.

Dr. Choi will explain how the center provides personalized care for individuals with medical issues caused by obesity, including high blood pressure, obstructive sleep apnea, asthma, diabetes or lipid disorders. This free educational event will address the most common questions regarding medical weight management and weight loss surgery.

SOME OF THE BENEFITS OF WEIGHT MANAGEMENT & WEIGHT LOSS SURGERY INCLUDE:
- Improving or resolving weight-related medical conditions such as diabetes, heart disease or hypertension
- Reducing the risk of developing certain types of cancer
- Breaking the cycle of long-term weight gain

Please call 281.428.2273 or visit houstonmethodist.org/weight-event-baytown to register.
